Common Themes from Stakeholder Interviews

Kaysville is:

- A quiet bedroom community with minimal traffic and good schools.
- Growing, but still feels like a small town.
- A safe place with people who love living here.

The City should:

- Provide services such as police and fire.
- Build and maintain necessary infrastructure.
- Continue to maintain public parks and preserve more open space.

I wish:

- There were more events and opportunities to be involved.
- There were more diverse housing options throughout the community.
- Kaysville had a better sense of place.
